(Lb version, peak mode)

- 2) If needed, press "MODE" button to select measurement mode. PEAK mode in this case
- 3) Hook on strap to pull luggage.
- 4) Once the pull force is higher than 2lb (1kg) scale will display highest pull force measured. This measured force is locked if reached within 3 sec after start of pull

(Kg version, peak mode)

(Lb version, peak mode)

- 5) Scale beeps twice if peak weight ≤50lb (1/4 second beeps with short pause in between) and 1 constant beep for 3 seconds for 50.2 lbs to 75 lbs.(beep)
- 6) Press "ON/OFF/TARE" button to use tare function while scale in "ON". Repeat from step (1), scale can do the next peak measurement.
- 7) Scale will turn off after 60 seconds if it is not any luggage to load or the reading is stable. Scale also can be turned off by pressing and holding "ON/OFF/TARE" button for 2 seconds.

Replacing the Battery

1. Unscrew the battery cover and remove the old battery.
2. Insert one new CR2032 button cell battery.
3. Replace the battery compartment cover and screw it tightly.

Troubleshooting

1. The display reads "LO"
The power in the lithium cell has been depleted. Change the battery.
2. The display reads "Err"
If pull force is over 34Kg/75 lbs scale will respond with repeated 12 beeps for 3 seconds for total of 12 beeps and will turn off immediately in lock or peak mode. In unlock mode, the display reading will go back to show value if the load return to normal (less than 34Kg/75 lbs)
